To Whom It May Concern:

**Re: Church & Dwight Arm & Hammer™ Sodium Bicarbonate Manufacturing Process**

Church & Dwight Sodium Bicarbonate is manufactured as follows:

Refined Sodium Carbonate is dissolved in purified water, filtered and fed into a carbonation column. Carbon dioxide is bubbled through the column forming Sodium Bicarbonate which is recovered, dewatered and dried.

The entire process takes place in a continuous fashion in closed dedicated equipment. A diagram of the process is included on the next page.

If you have any questions or comments, please feel free to contact me.
