 ARMEX™ **BLAST MEDIA**
MAINTENANCE FORMULA
TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

Maintenance Formula is specially formulated for use with baking soda-based delivery devices. The media is based on sodium bicarbonate (baking soda) which is a natural, water soluble, inorganic compound with a soft crystalline structure that makes it an ideal, mild abrasive. The media can be used to clean and remove virtually any coating from any substrate. MoistureGuard™2 absorbs moisture before it can create flow problems.
