To Whom It May Concern:

**Re: Church & Dwight Co., Inc. Arm & Hammer™ Ammonium Bicarbonate Treated and Untreated Storage and Handling Recommendations**

Even properly stored and packaged Ammonium Bicarbonate slowly releases ammonia gas ( $\text{NH}_3$ ), carbon dioxide gas ( $\text{CO}_2$ ), and water ( $\text{H}_2\text{O}$ ). Temperatures above 100°F will cause rapid decomposition of Ammonium Bicarbonate to ammonia gas ( $\text{NH}_3$ ), carbon dioxide gas ( $\text{CO}_2$ ), and water ( $\text{H}_2\text{O}$ ).

Store in cool, dry, well-ventilated area, away from any other products that could absorb the odor, and away from incompatible substances such as strong acids. Ammonium Bicarbonate reacts with acids to yield carbon dioxide gas, which can accumulate in confined spaces.

If you have any questions or comments, please feel free to contact me.
