Re: Church & Dwight Arm & Hammer™ Tortilla Blend™ Sodium Bicarbonate Manufacturing Process

Church & Dwight Co., Inc. Sodium Bicarbonate USP made by the refined soda ash process (Described here: <http://www.ahperformance.com/media/files/Church-and-Dwight-Sodium-Bicarbonate-Manufacturing-Process-04-01-2017.pdf>) is combined with less than 1% Silica, added via gravimetric feeder just ahead of the bagging step. The silica is added to improve the handling characteristics of the sodium bicarbonate in use. The material is then packaged in 50 pound net weight multiwall bags.
