

ARM & HAMMER™ Bicarbonates for Pharmaceuticals

Sodium Bicarbonate For Pharma:

A Perfect Fit For Any Process

The bicarbonate ion is a vital component of human physiology. Internally, it helps maintain blood pH; transports carbon dioxide from body tissue to the lungs for exhalation; and neutralizes stomach contents as they enter the intestinal tract. As a saliva component, it helps reduce the attack of orally generated acids on tooth enamel.

Grades/Specifications

Church & Dwight offers several grades of ARM & HAMMER™ Sodium Bicarbonate that meet the strictest requirements of the US, British, European and Japanese Pharmacopoeial monographs. The range of available particle sizes ensures a perfect fit for any process.

ARM & HAMMER™ Sodium Bicarbonate is kosher, halal and free of GMOs, TSE/BSE materials and allergens. Certification is available on our website, www.ahperformance.com. Please contact us to discuss your specific needs.

ARM & HAMMER™ Sodium Bicarbonate, USP Quality, Purity, Trust

Excipient Uses

- Effervescence
- Table Disintegration

Intermediate Uses

- Neutralizer / Buffer

Active Ingredient Uses

- Antacid
- Evacuant
- Dialysis Therapies
- Electrolyte Source

Other Uses

- Oral Care
- Personal Care
