Re: Church & Dwight Arm & Hammer™ Sodium Bicarbonate Treated No. 1 Powdered with Tricalcium Phosphate Added Manufacturing Process

Church & Dwight Co., Inc. Sodium Bicarbonate USP made by the refined soda ash process (described here: <http://www.ahperformance.com/media/files/Church-and-Dwight-Sodium-Bicarbonate-Manufacturing-Process-04-01-2017.pdf>) is combined with less than 1% Tricalcium Phosphate FCC, added via gravimetric feeder just ahead of the bagging step. The tricalcium phosphate is added to improve the handling characteristics of the sodium bicarbonate in use.
