To Whom It May Concern:

**Re: Church & Dwight Arm & Hammer™ Sodium Bicarbonate Treated No. 1 Powdered with Tricalcium Phosphate Added Manufacturing Process**

Church & Dwight Co., Inc. Sodium Bicarbonate USP made by the refined soda ash process (described here: <https://www.ahperformance.com/media/manufacturing-process-sodium-bicarbonate/>) is combined with less than 1% Tricalcium Phosphate FCC, added via gravimetric feeder just ahead of the bagging step.

The tricalcium phosphate is added to improve the handling characteristics of the sodium bicarbonate in use.

If you have any questions or comments, please feel free to contact me.
