To Whom It May Concern:

Re: Potential for Food Fraud associated with Arm & Hammer™ Ammonium Bicarbonate

Church & Dwight Co., Inc. Arm & Hammer™ Ammonium Bicarbonate is manufactured at BASF SE in Ludwigshafen Germany. Transportation to the US and import requirements are handled by BASF, shipping directly to Church & Dwight in Old Fort, Ohio. Inspection and review of shipping documents confirm the chain of custody from the manufacturing location to Church & Dwight.

We believe that food fraud risk is negligible and that the current controls for supplier management, tamper evident packaging and transportation inspection practices are adequate to maintain product integrity.

Feel free to contact me with any questions.
